PROFILE

MCA student and aspiring Software Developer with strong foundations in Python, JavaScript, and SQL, experienced in backend systems and cross-platform mobile applications. Skilled in FastAPI, React Native, GraphQL, and Django, with expertise in databases including PostgreSQL, MySQL, and MongoDB. Proficient in Agile workflows with Jira and collaborative development using GitHub. Familiar with Machine Learning and NLP, enabling integration of intelligent features into applications. Adept at working in teams and delivering scalable, production-ready solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

AI/ML Frameworks: scikit-learn, TensorFlow, Keras, PyTorch

Data Science Tools: NumPy, pandas, Matplotlib, Jupyter Notebook, Colab

NLP Libraries: NLTK, spaCy, Transformers

Web Frameworks: FastAPI, Django, Flask, Node.js, React.js, GraphQL

Databases: PostgreSQL, MongoDB, MySQL, SQLite

Concepts: Machine Learning, NLP, Data Preprocessing, REST & GraphQL API Development, Agile Development, Database Migrations

Version Control: Git, GitHub, Jira, Pytest

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

Doztix Group

11/2025 – Present

Ernakulam, Kerala

- Focused on backend development using Python, FastAPI, Alembic, Pytest, and PostgreSQL.
- Designed and optimized GraphQL APIs for efficient data exchange.
- Implemented database schema migrations and query optimization to improve performance.
- Worked in an Agile environment, with tasks assigned and tracked through Jira, and version control managed via GitHub.

Python Web Developer Intern

Luminar Technolab

07/2023 – 01/2024

Kochi, Kerala

- Developed and maintained backend services using Python (Django) and REST frameworks.
- Implemented CRUD operations, authentication, and database models with MySQL and Django ORM.
- Created and consumed RESTful APIs for seamless data exchange between frontend and backend.

Administrative Assistant

Thomson Paper Products

06/2022 – 05/2023

Kottayam, Kerala

EDUCATION	
MCA (Master of Computer Applications) Marian College Kuttikkanam Autonomous	2024 – 2026 Idukki, Kerala
BCA (Bachelor of Computer Applications) Mahatma Gandhi University	2019 – 2022 Kottayam, Kerala

PROJECTS	
CycleHub (An Ecommerce Application) Python, Django, HTML, CSS, SQLite, Bootstrap - Developed backend for e-commerce platform handling cart, order, and payment processing. - Designed database models, product filtering, and user authentication using Django ORM.	
CareerLink (A Job Portal Application) Python, Django, HTML, CSS, MySQL, Bootstrap - Implemented backend logic with Python for recruiter-jobseeker matching and candidate recommendation workflows. - Worked on data filtering algorithms to enhance job search accuracy.	
MockMate (AI-Powered Interview Preparation Application) React.js, JavaScript, Node.js, MongoDB, Tailwind CSS, NLP, Gemini API - Designed an AI-powered interview preparation system integrating NLP-based Q&A generation using Python. - Implemented text preprocessing, semantic similarity matching, and automated feedback models using spaCy and NLTK. - Developed RESTful APIs for AI-frontend communication and deployed analytics dashboards for user feedback insights.	

CERTIFICATIONS	
• NACTET - Certified Python Web Development Expert	• Udemy - The Complete Python Bootcamp Certification
• NPTEL - Software Testing Certification	• IBM - Generative AI: Introduction and Applications
• SQL (Advanced) - HackerRank
